About Holy Qu-ran

TRANSLATE: ES FR DE AR ZH JA

The Quran, also romanized Qur'an or Koran, is the central religious text of Islam, believed by Muslims to be a revelation directly from God (Allāh). It is organized in 114 chapters which consist of individual verses. Browse, Search, and Listen to the Holy Quran. Read the Holy Quran online and listen to the beautiful recitation of every Surah.

5*A & Nevai Search Engine - Complete Project

Project Overview

This repository contains two distinct, production-ready applications developed under a single parent directory:

1. **5A_Search (Nevai)** - An AI-powered search engine aggregating 20+ APIs
2. **five_star_a (5*A / Five Star A)** - A comprehensive task and project management system

Project Structure Overview

Top-Level Directory Structure

```

└── five_star_a/            # 5*A Task Management System
```

Application 1: Nevai Search Engine

Overview

Name: Nevai (5A_Search)
Type: AI-Powered Multi-Source Search Engine
Architecture: Single Page Application (SPA)
Design Philosophy: Minimalist, privacy-focused, no API keys required

Technology Stack

Technology	Version	Purpose
React	19	UI framework
TypeScript	Latest	Type safety and development experience
Vite	Latest	Build tool and dev server
Tailwind CSS	4	Styling framework
web-llm	Latest	Local AI model execution
clsx	Latest	Conditional className utility
tailwind-merge	Latest	Tailwind class merging

Core Features

1. Multi-Source Search Aggregation

API Sources (20+):

General Knowledge:

- DuckDuckGo (Primary search, instant answers)
- SearXNG (Privacy-focused meta-search)
- Wikipedia (Encyclopedia articles)
- Wikidata (Structured knowledge base)
- DBpedia (Semantic data)

Specialized Wikimedia:

- Wikiquote (Quotations)
- Wikibooks (Educational textbooks)
- Wikivoyage (Travel guides)
- Wikisource (Source documents)
- Wikiversity (Educational resources)
- Wikimedia Commons (Media files)

Academic and Technical:

- Open Library (Books and publications)
- arXiv (Scientific papers)
- Hacker News (Tech news and discussions)
- GitHub (Code repositories)
- Dev.to (Developer articles)

Social and Media:

- Reddit (Community discussions)
- iTunes (Music and podcasts)
- Deezer (Music streaming)

Data and Services:

- CoinGecko (Cryptocurrency data)
- OpenMeteo (Weather information)
- RestCountries (Country data)

2. Search Categories

Available Search Types:

- Web Search (General queries)

- News Search (Latest articles)
- Image Search (Visual content)
- Instant Answers (Quick facts)
- Definitions (Word meanings)
- Weather Information (Location-based)
- Time and Date (World clock)
- Translations (Multi-language)

3. AI-Powered Features

Local LLM Integration:

- Runs entirely in the browser using WebAssembly
- No data sent to external servers
- Privacy-preserving AI chat
- Context-aware responses
- Model: Configurable through web-llm

AI Capabilities:

- Generate search result summaries
- Answer follow-up questions
- Explain complex topics
- Compare search results
- Extract key information

4. User Interface Features

Home Page:

- Clean, minimal search interface
- Category quick access grid
- Dark/light theme toggle
- Keyboard navigation support

Results Page:

- Tabbed interface for different result types
- AI summary cards
- Bookmark functionality
- Result filtering and sorting
- Pagination support

Navigation:

- Command palette (keyboard shortcuts)
- Bookmarks panel
- Category browser
- Newsletter subscription
- Footer with additional links

5. Security Features

Input Sanitization:

- XSS prevention
- SQL injection protection
- Script tag filtering
- URL validation

Console Security:

- Console locking mechanism
- Warning messages for self-XSS
- Development mode detection

Security Headers:

- Content Security Policy checking
- HTTPS enforcement
- Referrer policy validation

6. User Experience

Features:

- URL bookmarkable searches (query parameters)
- Browser history integration
- Local storage for preferences
- Dark mode with system preference detection
- Mobile-responsive design
- PWA-ready (Progressive Web App)
- Offline capability planning

Performance:

- Code splitting
- Lazy loading of components
- Optimized bundle size
- Fast initial load time

Complete File Structure

Configuration Files

Nevai Search Engine

Nevai is an AI-powered multi-source search engine built as a Single Page Application with a minimalist, privacy-focused design that requires no API keys.

Technology Stack

Technology	Version	Purpose
React	19	UI framework
TypeScript	Latest	Type safety
Vite	Latest	Build tool
Tailwind CSS	4	Styling
web-llm	Latest	Local AI execution

API Sources by Category

Category	Sources
General Knowledge	DuckDuckGo, SearXNG, Wikipedia, Wikidata, DBpedia
Wikimedia	Wikiquote, Wikibooks, Wikivoyage, Wikisource, Wikiversity

Category	Sources
Academic/Tech	Open Library, arXiv, Hacker News, GitHub, Dev.to
Social/Media	Reddit, iTunes, Deezer
Data Services	CoinGecko, OpenMeteo, RestCountries

Search Categories

Type	Description
Web Search	General queries across multiple sources
News Search	Latest articles from news aggregators
Image Search	Visual content results
Instant Answers	Quick factual responses
Definitions	Word meanings and explanations
Weather	Location-based weather data
Time/Date	World clock and timezone data
Translations	Multi-language translation support

AI Features

- Runs entirely in browser using WebAssembly
- No data sent to external servers
- Privacy-preserving AI chat with context-aware responses
- Generates search result summaries and answers follow-up questions
- Explains complex topics and compares search results
- Extracts key information from results

Security Implementation

Area	Implementation
Input Sanitization	XSS prevention, SQL injection protection, script filtering, URL validation
Console Security	Console locking in production, self-XSS warnings
Security Headers	CSP checking, HTTPS enforcement, referrer policy validation

5*A Task Management System

5*A is a full-stack task and project management platform with REST API backend, Vanilla JavaScript frontend, and Chrome Extension. Features a minimalist Zara-inspired black and white aesthetic.

Backend Technology Stack

Technology	Purpose
Python 3.11+	Programming language
FastAPI	Web framework
SQLAlchemy 2.0+	ORM
PostgreSQL 15	Primary database
Redis 7	Caching and rate limiting
Pydantic 2.0+	Data validation
python-jose	JWT handling
passlib/bcrypt	Password hashing

Technology	Purpose
pyotp	TOTP 2FA
spacy/dateparser	NLP parsing

Frontend Technology

Technology	Purpose
Vanilla JavaScript	Core logic
HTML5/CSS3	Markup and styling
Cormorant Garamond	Primary font
Space Grotesk	Secondary font

User Roles and Permissions

Feature	Admin	PM	Employee
Create Users	Yes	No	No
Create Projects	Yes	Yes	No
Assign Tasks	Yes	Yes	No
Update Any Task	Yes	Yes	No
Update Own Task	Yes	Yes	Yes
View Team Analytics	Yes	Yes	No
Export Data	Yes	Yes	Yes (own)

Database Tables (21 Total)

Table	Purpose
users	User accounts and profiles
oauth_accounts	OAuth provider connections
projects	Project definitions
tasks	Task definitions
task_attachments	Task file attachments
task_comments	Task comments
labels	Label definitions
collections	Project collections
notifications	User notifications
integrations	Third-party integrations

Key API Endpoints

Category	Endpoints	Count
Authentication	/auth/register, /auth/login, /auth/2fa/setup, /auth/2fa/verify	6
Users	/users, /users/me, /users/{id}, /users/search	6
Projects	/projects, /projects/{id}, /projects/{id}/share	7
Tasks	/tasks, /tasks/{id}, /tasks/{id}/status, /tasks/voice	12
Analytics	/analytics/productivity, /analytics/weekly, /analytics/trends	5
Export	/export/tasks/json, /export/tasks/csv	3

Category	Endpoints	Count
Focus	/focus/weather, /focus/pomodoro/start, /focus/goals	7
Views	/views/list, /views/kanban, /views/calendar, /views/matrix	10

10 View Engines

View	Key Features
List	Sortable columns, inline editing, bulk selection, CSV export
Kanban	Drag-drop between columns, WIP limits, card details on hover
Calendar	Month/week/day views, drag to reschedule, multi-day events
Matrix	Eisenhower quadrants, urgency vs importance scoring
Map	Geolocation display, interactive map, task markers
Grid	Visual card layout, customizable columns, quick actions
Planner	Timeline visualization, dependency tracking, milestones
Skyline	Workload visualization, capacity planning, resource allocation
Stream	Activity feed, real-time updates, notification integration
Workload	Team capacity analysis, task distribution, overload alerts

Testing Results

Metric	Value
Total Tests	54
Passing Tests	52
Pass Rate	96.3%
Average Coverage	73%

Deployment Configuration

Service	Image	Port	Purpose
postgres	postgres:15-alpine	5432	Primary database
redis	redis:7-alpine	6379	Caching and rate limiting
backend	Custom build	8000	FastAPI application

Environment Variables

Variable	Purpose
DATABASE_URL	Database connection string
REDIS_URL	Redis connection string
SECRET_KEY	JWT signing key
ACCESS_TOKEN_EXPIRE_MINUTES	Access token lifetime
CORS_ORIGINS	Allowed CORS origins

Rate Limiting

Setting	Value
Requests per minute	100
Window duration	60 seconds

Setting	Value
Exempt paths	/health, /docs, /openapi.json, /redoc
Exceeded response	HTTP 429 with Retry-After header

Completed Features

Core authentication, user management, project CRUD, task management with status validation, 10 view engines, rate limiting, database migrations, test suite (96.3% passing), Chrome extension, analytics, WebSocket notifications, focus panel widgets, export functionality, friend system, password reset, 2FA with TOTP, OAuth providers, and Nevai search engine.

API

Total Endpoints: 100+ across 17 categories including Authentication, Users, Projects, Tasks, Labels, Collections, Notifications, Analytics, Export, Focus, Views, Comments, Attachments, Friends, Password Reset, Integrations, and System endpoints.

This document provides a condensed overview of the R_Project_Ahmed_Abobakr repository containing two production-ready applications: Nevai (privacy-focused AI search engine with 20+ API integrations) and 5*A (full-featured task management with role-based access, 10 view engines, real-time notifications, and Docker deployment).

Development Roadmap

Completed Features (Phase 1-8)

- ✓ Core authentication system
- ✓ User management
- ✓ Project CRUD operations
- ✓ Task management with status validation
- ✓ 10 view engines
- ✓ Rate limiting
- ✓ Database migrations (Alembic)
- ✓ Test suite (96.3% passing)
- ✓ Chrome extension
- ✓ Analytics and reporting
- ✓ Notifications (WebSocket)
- ✓ Focus panel widgets
- ✓ Export functionality
- ✓ Friend system
- ✓ Password reset
- ✓ 2FA with TOTP
- ✓ OAuth providers
- ✓ Search engine (Nevai)

API Endpoint

Authentication (6 endpoints)

- POST /auth/register
- POST /auth/login
- POST /auth/refresh
- POST /auth/2fa/setup
- POST /auth/2fa/verify
- POST /auth/logout

Users (6 endpoints)

- GET /users
- GET /users/me
- GET /users/{id}
- PUT /users/{id}
- DELETE /users/{id}
- GET /users/search

Projects (7 endpoints)

- GET /projects
- POST /projects
- GET /projects/{id}
- PUT /projects/{id}
- DELETE /projects/{id}
- POST /projects/{id}/share
- POST /projects/{id}/duplicate

Tasks (12 endpoints)

- GET /tasks
- POST /tasks
- GET /tasks/{id}
- PUT /tasks/{id}
- DELETE /tasks/{id}
- PATCH /tasks/{id}/status
- POST /tasks/{id}/assign
- POST /tasks/voice
- POST /tasks/email
- POST /tasks/{id}/recurrence/run
- GET /tasks/search
- POST /tasks/bulk

Labels (4 endpoints)

- GET /labels
- POST /labels
- PUT /labels/{id}
- DELETE /labels/{id}

Collections (4 endpoints)

- GET /collections
- POST /collections
- PUT /collections/{id}
- DELETE /collections/{id}

Notifications (5 endpoints)

- GET /notifications
- PATCH /notifications/{id}/read
- POST /notifications/read-all
- DELETE /notifications/{id}
- WebSocket /notifications/stream

Analytics (5 endpoints)

- GET /analytics/productivity

- GET /analytics/weekly
- GET /analytics/monthly
- GET /analytics/trends
- GET /analytics/team

Export (3 endpoints)

- GET /export/tasks/json
- GET /export/tasks/csv
- GET /export/analytics

Focus (7 endpoints)

- GET /focus/weather
- POST /focus/pomodoro/start
- POST /focus/pomodoro/{id}/complete
- GET /focus/pomodoro/history
- GET /focus/goals
- POST /focus/goals
- POST /focus/goals/{id}/complete

Views (10 endpoints)

- GET /views/dashboard
- GET /views/list
- GET /views/kanban
- GET /views/calendar
- GET /views/matrix
- GET /views/map
- GET /views/grid
- GET /views/planner
- GET /views/skyline
- GET /views/stream

Comments (4 endpoints)

- GET /tasks/{id}/comments
- POST /tasks/{id}/comments
- PUT /comments/{id}
- DELETE /comments/{id}

Attachments (3 endpoints)

- POST /tasks/{id}/attachments
- GET /attachments/{id}
- DELETE /attachments/{id}

Friends (4 endpoints)

- GET /friends
- POST /friends/request
- POST /friends/accept
- POST /friends/block

Password Reset (2 endpoints)

- POST /password-reset/request
- POST /password-reset/confirm

Integrations (5 endpoints)

- GET /integrations
- POST /integrations/spotify
- POST /integrations/calendar/sync
- GET /integrations/spotify/playlists
- POST /integrations/spotify/play

System (2 endpoints)

- GET /health
- GET /openapi.json

Total: 100+ API endpoints

This document provides a comprehensive overview of the R_Project_Ahmed_Abobakr repository, containing two production-ready applications:

1. **Nevai (5A_Search)** - A privacy-focused AI-powered search engine aggregating 20+ APIs with local LLM capabilities
2. **5*A (Five Star A)** - A full-featured task and project management system with:
 - Role-based access control
 - 10 unique view engines
 - Real-time notifications
 - Comprehensive analytics
 - Chrome extension
 - Docker deployment
 - 96.3% test coverage
 - 21-table database schema
 - 100+ API endpoints
