PROFESSIONAL SUMMARY

Final-year Data Science student at Helwan National University (GPA 3.58) specializing in Data Engineering and ML/AI Engineering, co-founded a zero-knowledge encrypted collaboration platform (NEVAI), shipped an AI job platform with 200+ users, and completed apprenticeships in Generative AI. Certified by IBM, Harvard, Google, Duke, and Microsoft, seeking internship in Data Engineering or ML/AI Engineering.

EDUCATION (OCT 2023 – JUL 2027)

Helwan National University – Faculty of Computer Science & Artificial Intelligence

Bachelor's Degree in Data Science

GPA: 3.58 / 4.00

EXPERIENCE

CO-FOUNDER & ENGINEER – NEVAI (AUG 2024 – PRESENT)

- Architected client-side E2E encryption using XSalsa20-Poly1305 with browser-side key derivation (sCrypt + nacl)
- Built real-time collaboration engine via ChainPad operational transforms over WebSocket

GENERATIVE AI ENGINEER (APPRENTICESHIP) – ITI (JAN 2026 – MAR 2026)

- Completed NVIDIA Deep Learning Institute program on Generative AI
- Worked with LLMs, RAG pipelines, and LangChain for AI applications
- Stack: Python · LangChain · Hugging Face · RAG · NLP

SKILLS

Languages : Python, Java, JavaScript, C/C++, SQL

ML & AI : TensorFlow, PyTorch, Keras, Scikit-learn, LangChain, Hugging Face, NLP, Computer Vision

Data Engineering : Apache Spark, Apache Kafka, ETL Pipelines, NoSQL, Data Warehousing, Docker, GCP

MLOps : MLflow, Kubernetes, CI/CD, Git

Visualization : Power BI, Matplotlib, Seaborn, Pandas, NumPy

PROJECT EXPERIENCE

CareerBuddy – AI Career Intelligence Platform (Apr 2025 – Jun 2025)

- Built AI platform analyzing live job listings for AI disruption risk using Groq's LLaMA model (0–100 risk score per job)
- Fetches real-time jobs via Remote API with smart filters
- 187 production deployments on Vercel - Stack: Vanilla JS · Node.js · Vercel Serverless · Groq · LLaMA

Camera Hand-Tracking Games (Dec 2024 – Jan 2025)

- Developed 5 browser-based gesture-recognition games using MediaPipe Hands, improving real-time performance.
- Optimized event-driven design, reducing latency by 30%, demonstrating performance-focused engineering

Explainable Hybrid Detection of Urban Visual Pollution (Mar 2024 – Jul 2024)

- Developed hybrid computer vision model to detect urban visual pollution, achieving 82.5% mAP on custom dataset.
- Applied Grad-CAM explainability techniques and delivered actionable insights via data visualization dashboards.

CERTIFICATIONS & COURSES

IBM Data Science Professional Certificate – IBM

IBM Data Engineering Professional Certificate – IBM

IBM AI Engineering Professional Certificate – IBM

IBM Machine Learning Professional Certificate – IBM

GCP Data Engineering, Big Data & ML – Google

Microsoft AI & ML Engineering Professional Certificate – Microsoft

CS50 AI with Python – Harvard

MLOps Professional Certificate – Duke University

VOLUNTEER EXPERIENCE

Technical Coordinator – MetaCode ICPC Event, HNU (Apr–May 2025)

- Organized competitive programming contest for 100+ participants
- Built automated registration scripts and provided live tech support
